Duration:	Permanent (after probation period).
Location:	Bristol (Preferred) or Aberystwyth (Head Quarters).
Closing Date:	When Appointed.
Contact Details:	Dr. Andrew D. Hallgarth, Managing Director, 0845 8382026 or ahallgarth@HazRes.com

The Company:

Hazard Research & Risk Consultants Ltd (HazRes) is a rapidly growing and technologically advanced process safety and risk management consultancy company with physical testing facilities. HazRes works closely with clients in the major industrial and commercial sectors to help them recognize, quantify and manage situations where hazards, risks, environmental and energy problems are encountered.

HazRes' HQ is based in Aberystwyth, Mid Wales, but is planning to open a Bristol Area Office in 2010 Q1.

The Opportunity:

HazRes' philosophy is to bring radical and novel thinking to business and process problems. We wish to recruit people who not only believe in our philosophy, but strive to be the best in their chosen field. We are seeking highly motivated, dynamic and influential individuals with a strong background in process safety and risk management to join our UK operations and can further the development and growth of our businesses.

We require dynamic thinkers who can rise to challenges and strive for excellence with engineering and scientific expertise, commercial awareness and technical insight. Candidates should have a good understanding of the technical & management issues fundamental to process safety & risk management in industries where flammable, toxic or explosive materials (including dust) are met. The candidate should be able to build up a technical case from scientific first principles.

About You:

You will hold a good bachelor's degree or higher, in a relevant engineering or scientific discipline. You will have proven experience of working in one or more of our present fields, but specifically Chemical, Defence, Food, Energy, Metals, Minerals, Oil & Gas, Petrochemical, Pharmaceutical either as an internal specialist or an external process safety and risk management consultant for at least three (3) years.

You will be expected initially to follow-up leads generated by others and produce high quality proposals, the majority of which lead to a project award. After a period of development, depending on your grade, you should be able to identify and win new business opportunities, both domestically and internationally when suitable opportunities arise. You will provide advice to the Managing Director relating to new business opportunities and have the ability to be technically innovative. You will conduct & manage projects and be responsible for ensuring delivery of high quality technical consultancy services to clients, within time and budget.

You will be able to travel internationally and work on-site when required. You will have a clean UK driving licence and be able to pass project security clearance, when & if required. Candidates must be a UK national, or have a valid work permit that is easily extendable. You will have fluent written and spoken English and a foreign language would be advantageous.
